PHS SERIES

SEMI-AUTOMATIC ROTARY PLASTIC TO PLASTIC CLAMSHELL & BLISTER SEALING MACHINE

YOUR MARKET ... OUR SOLUTIONS

Starview's **PHS Series** rotary type Clamshell and Blister sealers are designed for medium to higher volume production requirements. These machines may be used for Plastic-to-Plastic Clamshell sealing as well as conventional carded blisters, full face blisters and half-clamshell styles including applications using Tyvek, foils and other heat sealable lidstock. The **PHS Series** units are available in three (3), six (6) and eight (8) station designs. The three-station machines are only available with a 14" x 18" sealing area. Six and Eight station models are available in standard sealing areas of 14 x 18 and 18 x 24 inches. Larger sealing areas are available on request. The standard machines feature one heated sealing station and one cooled station with the remaining stations used for load/unload stations.

For machines capable of higher production rates and value-added automation Starview's **PHSA Rotary** and **BSC II Carousel** fully automatic sealers should be considered.

the STARVIEW ADVANTAGE

- A wide range of standard and custom features available to match customer requirements.
- ANSI Class 4 machine safety for operator protection.
- Color touch screen HMI for the ultimate in operator convenience and accessibility. Includes storage for 99 databases and on-screen data tracking.
- A Starview exclusive remote access via standard Ethernet hardwire or optional Wi-Fi router gives management access to real-time process information from the machine.
- Starview's exclusive hot/cold sealing press system allows plastic to plastic sealing of PVC, RPVC, PETG, RPETG, GAG PET, GRG PET and similar materials without the use of RF generators.
- AC Variable frequency precision cam index rotary table drive for smooth table operation and position repeatability.
- Starview's exclusive selectable sealing station program allows the use of one (1) through the maximum sealing fixtures with operator selected start position from the HMI for short runs or single person operation.
- Industry leading design, construction, features and customer support.
